on mining, environment
and valorization of
Tébessa mineral
resources**

(NCMEVTMR 2026)

ILACRE
Laboratory of Applied Chemistry
and Renewable Energies

18 and 19 April 2026

Aim of the conference

The National Conference on Tébessa's Mineral Resources aims to develop a strategic roadmap to transform the region from a raw material extraction site into a sustainable industrial valorization hub. It will address mining-related environmental challenges while maximizing the economic potential of phosphate and other minerals through advanced processing and circular economy approaches. By bringing together researchers, industry leaders, and policymakers, the conference seeks to promote environmental protection, innovation, and improved livelihoods in Tébessa.
